SUMMARY

Full-Stack AI Engineer specializing in distributed systems, agentic workflow orchestration, and LLM integrations. Production experience spans full-stack architecture (React/TypeScript, Python/FastAPI, PostgreSQL) and RAG-driven systems deployed on GCP.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frontend: React, TypeScript, Next.js, Redux, Tailwind CSS

Backend & APIs: Node.js, Express, FastAPI, RESTful APIs, PostgreSQL, GCP

AI / Generative AI: LangChain, LangGraph, RAG, Gemini API, Claude API, Google Opal, Stable Diffusion, Ollama

ML / Data: Pandas, NumPy, Matplotlib, scikit-learn, PyTorch

Tools & DevOps: Git, Docker, Postman, Streamlit, Linux

EDUCATION

K J Somaiya School of Engineering

Aug 2024 – Jul 2026

Master of Technology in Artificial Intelligence and Data Science | CGPA: 7.9

Mumbai, India

Vasantdada College of Engineering

Aug 2020 – May 2024

Bachelor of Engineering in Information Technology | CGPA: 7.94

Mumbai, India

EXPERIENCE

AI Intern — AI & Full Stack Developer

Jul 2025 – Apr 2026

Jio Creative Lab

Mumbai, India

- Architected and deployed Venta, an enterprise CRM with role-based access control across 4 organizational tiers, becoming the system of record for daily operations across a 20+ member Sales and BD team.
- Orchestrated 3 automated AI pipelines on Google Opal and LLM APIs, owning end-to-end design and reducing manual market-research time by 45%.
- Engineered high-throughput web-scraping pipelines and SQL-backed dashboards, giving the sales org real-time visibility into 80+ validated B2B leads surfaced weekly.
- Benchmarked multi-modal generative image and video models against production design briefs, establishing evaluation standards adopted across 12+ creative campaigns.
- Spearheaded 10+ hands-on generative-AI enablement workshops, driving cross-functional tool adoption across 30+ non-technical team members.

Web Development Intern

Apr 2022 – Aug 2023

IBM SkillsBuild, GetFly Technologies, Exposys Data Lab

Mumbai, India

- Delivered responsive frontend interfaces (HTML5/CSS3/JavaScript) across three Agile internships, cutting UI bug-resolution time by 25%.

PROJECTS

Venta — Enterprise CRM & AI Workspace

[Live Demo](#)

React, TypeScript, FastAPI, Gemini API

- Integrated an LLM-based drafting engine into Google Workspace via the Gemini API (cutting sales email composition time by 60%), backed by a PostgreSQL schema and FastAPI service layer for real-time client-status transitions and communication-log persistence.

BIZintel & Brand Hierarchy — Autonomous Market Intelligence Engine

[View App](#)

Python, Google Opal, BeautifulSoup

- Automated a BeautifulSoup-based scraping and entity-resolution pipeline (extraction → normalization → storage), indexing relational hierarchies across 500+ commercial brands and eliminating 15 hours of manual analysis per week.

BrandCrafter — Generative Asset Pipeline

[View App](#)

Google Opal, Generative AI APIs, React

- Constructed a prompt-to-visual generation pipeline chaining LLM brief-parsing with generative image APIs, shortening initial review cycles from 3 days to under 4 hours.

F1 Performance Analytics Engine

[GitHub](#)

Python, Pandas, Matplotlib

- Formulated a multi-variable weighted-scoring algorithm (wins, podium-conversion, poles) to rank driver performance across 20+ racing seasons.

CERTIFICATIONS

Statistical Modeling for Data Science Applications — Univ. of Colorado Boulder, Coursera (Nov 2025)

Data Preparation and Analysis — Illinois Institute of Technology, Coursera (Nov 2025)

Introduction to Big Data with Spark and Hadoop — IBM, Coursera (Oct 2024)
